Vishesh Hindi Vyakaran 6

Set in Aligarh in the early 1960s, after the dust of Partition has ostensibly settled, Topi Shukla is an intriguing story of two friends—one Hindu and the other Muslim. Through the characters of people like Topi and Iffan, the novel looks at the lives of ordinary people trying to survive in a society that insists on a brutal conformity of behaviour. It is about individuals whose spirits are paralysed because they cannot conform, and about history's inability to teach mankind any worthwhile lessons. Language plays an important part in this narrative, operating almost as a character in its own right. Topi, as a Hindi bull in the Urdu china shop, invokes the historical stand-off between the two languages. The novel also explores the culture and psyche of Uttar Pradesh with its very

Muslim Aligarh, its very Hindu Benares, and their exotic confluence in Lucknow. Although it is set in the India of the 1960s, the communal tensions and issues portrayed in the novel make it just as relevant to the troubled times we face today. This fascinating novel will be of tremendous interest to the general reader, as well as to students of literature in translation, partition fiction, and social history. The novel's engagement with intertextuality and metafiction will add to its interest for readers keen on literary theory.

CHAPTER I. Three invalids.-Sufferings of George and Harris.-A victim to one hundred and seven fatal maladies.-Useful prescriptions.-Cure for liver complaint in children.-We agree that we are overworked, and need rest.-A week on the rolling deep?-George suggests the River.-Montmorency lodges an objection.-Original motion carried by majority of three to one. There were four of us-George, and William Samuel Harris, and myself, and Montmorency. We were sitting in my room, smoking, and talking about how bad we were-bad from a medical point of view I mean, of course. We were all feeling seedy, and we were getting quite nervous about it. Harris said he felt such extraordinary fits of giddiness come over him at times, that he hardly knew what he was doing; and then George said that he had fits of giddiness too, and hardly knew what he was doing. With me, it was my liver that was out of order. I knew it was my liver that was out of order, because I had just been reading a patent liver-pill circular, in which were detailed the various symptoms by which a man could tell when his liver was out of order. I had them all. It is a most extraordinary thing, but I never read a patent medicine advertisement without being impelled to the conclusion that I am suffering from the particular disease therein dealt

with in its most virulent form. The diagnosis seems in every case to correspond exactly with all the sensations that I have ever felt. [Picture: Man reading book] I remember going to the British Museum one day to read up the treatment for some slight ailment of which I had a touch of hay fever, I fancy it was. I got down the book, and read all I came to read; and then, in an unthinking moment, I idly turned the leaves, and began to indolently study diseases, generally. I forget which was the first distemper I plunged into—some fearful, devastating scourge, I know—and, before I had glanced half down the list of "premonitory symptoms," it was borne in upon me that I had fairly got it. I sat for awhile, frozen with horror; and then, in the listlessness of despair, I again turned over the pages. I came to typhoid fever—read the symptoms—discovered that I had typhoid fever, must have had it for months without knowing it—wondered what else I had got; turned up St. Vitus's Dance—found, as I expected, that I had that too,—began to get interested in my case, and determined to sift it to the bottom, and so started alphabetically—read up ague, and learnt that I was sickening for it, and that the acute stage would commence in about another fortnight. Bright's disease, I was relieved to find, I had only in a modified form, and, so far as that was concerned, I might live for years. Cholera I had, with severe complications; and diphtheria I seemed to have been born with. I plodded conscientiously through the twenty-six letters, and the only malady I could conclude I had not got was housemaid's knee. I felt rather hurt about this at first; it seemed somehow to be a sort of slight. Why hadn't I got housemaid's knee? Why this invidious reservation? After a while,

however, less grasping feelings prevailed. I reflected that I had every other known malady in the pharmacology, and I grew less selfish, and determined to do without housemaid's knee. Gout, in its most malignant stage, it would appear, had seized me without my being aware of it; and zymosis I had evidently been suffering with from boyhood. There were no more diseases after zymosis, so I concluded there was nothing else the matter with me. I sat and pondered. I thought what an interesting case I must be from a medical point of view, what an acquisition I should be to a class! Students would have no need to "walk the hospitals," if they had me. I was a hospital in myself. All they need do would be to walk round me, and, after that, take their diploma.
