Awarded the Nobel Prize for Literature in 1969, Samuel Beckett's influence on 20th century fiction and drama is immeasurable. Published in conjunction with the RT (Radio Telef s ireann) Thomas Davis Lecture Series to mark the centenary of Beckett's birth, Samuel Beckett - 100 Years consists of thirteen essays by many of the foremost academics studying Beckett today. Literary luminaries such as John Banville and Anthony Cronin line up alongside philosophers Dermot Moran and Richard Kearney to delve into the psyche of the man responsible for classics such as Murphy, Krapp's Last Tape, and Waiting for Godot, while actors Barry McGovern and Rosemary Pountney describe what makes his works so theatrical. The book is a challenging and serious look at Beckett's work and its impact on literature today.

The Zero Carbon Car examines the hundreds of ways in which car manufacturers are trying to reduce our carbon footprint, and the adaptation of the automotive industry to changing technology in a world where environmental issues are becoming ever more prevalent. The book's in-depth research into green car technology shows that manufacturers make concerted efforts, but sometimes also defeat the gains of their innovation. Topics covered include: What is meant by the terms 'global warming' and 'green', and how these can be defined; An account of the long history of green automotive technology; Alternative fuels, including diesel and hydrogen; Developments in environmentally friendly engine technology;

Hinduism who were seeking a faith that taught the possibility of achieving a society founded on love and compassion for their fellow man. The new doctrine reached the island nation of Japan where it was so well received that Christianity threatened to supplant Buddhism as the dominant religion. By the close of the 16th century Japanese Christians numbered in the millions. Fifty years later Christianity was officially proscribed and Christians faced execution for openly practicing their faith. Jesus and the Samurai tells their fascinating story with facts drawn from ancient and modern sources.

"The second, revised and enlarged edition of this dictionary provides a wealth of profound information on renewable resources. Topics are all relevant plant and animal sources and the substances derived thereof, the standard technologies of isolation and derivatization, and the major fields of application - with regard to economic aspects and future developments. In addition to the 'classical' use as raw materials of the chemical industry, the fields of energy/fuels, practical substances of cosmetics and aromas are treated. Not only modern methods are taken into account but also older, almost forgotten fields that stimulate new considerations."--BOOK JACKET.

The first GSX-R was created in 1985 as a groundbreaking departure from the ponderous sportbikes of the day. That revolutionary motorcycle took a time-honored racing credo to heart: light is right. (And another one: It can never be too fast.) Never before had the performance and design of a race bike been so faithfully carried over to the street. In the seven generations since, Suzuki has remained true to the concept of the original GSX-R: to build the most serious, track-worthy sportbike. What's more, the company's engineers have been relentless in
