A Reference Grammar of Dutch is aimed at English-speaking students of Dutch at beginner/intermediate level. It is designed to be practical and user-friendly: grammatical information is presented in short entries arranged in alphabetical

order, allowing students to gain easy access to specific points of grammar or problematic points of vocabulary as they encounter them in practice. Each grammatical rule is illustrated by simple, everyday Dutch examples of the kind likely to be encountered and used by the learner. Specialised linguistic terminology is kept to a minimum, with a glossary of essential terms provided, and charts and tables are included to help the student focus on the main points. Each entry is linked to a set of exercises which are graded according to complexity, and there is a key to the exercises at the back of the book. A thorough index is also provided.

Educated people have become bereft of sophisticated ways to develop their religious inclinations. A major reason for this is that theology has become vague and dull. In *The Character of God*, author Thomas E. Jenkins maintains that Protestant theology became boring by the late nineteenth century because the depictions of God as a character in theology became boring. He shows how in the early nineteenth century, American Protestant theologians downplayed biblical depictions of God's emotional complexity and refashioned his character according to their own notions, stressing emotional singularity. These notions came from many sources, but the major influences were the neoclassical and sentimental literary styles of characterization dominant at the time. The serene benevolence of neoclassicism and the tender sympathy of sentimentalism may have made God appealing in the mid-1800s, but by the end of the century, these styles had lost much of their cultural power and increasingly came to seem flat and vague. Despite this, both liberal and conservative theologians clung to these

characterizations of God throughout the twentieth century. Jenkins argues that a way out of this impasse can be found in romanticism, the literary style of characterization that supplanted neoclassicism and sentimentalism and dominated American literary culture throughout the twentieth century. Romanticism emphasized emotional complexity and resonated with biblical depictions of God. A few maverick religious writers-- such as Harriet Beecher Stowe, W. G. T. Shedd, and Horace Bushnell--did devise emotionally complex characterizations of God and in some cases drew directly from romanticism. But their strange and sometimes shocking depictions of God were largely forgotten in the twentieth century. s use "theological" as a pejorative term, implying that an argument is needlessly Jenkins urges a reassessment of their work and a greaterin understanding of the relationship between theology and literature. Recovering the lost literary power of American Protestantism, he claims, will make the character of God more compelling and help modern readers appreciate the peculiar power of the biblical characterization of God.

### **Dutch**

### **The Eastern Origin of the Celtic Nations Proved by a Comparison of Their Dialects with the Sanskrit, Greek, Latin, and Teutonic Languages**

The fundamental distinctive of this textbook is its spiral, rather than linear, methodology of teaching the Greek language. The student is introduced to all the essential grammar quite rapidly in order to develop an overall understanding of the structure of the language. The grammatical details, which cannot be fully mastered in the initial overview, are revisited in succeeding lessons to fill in gaps of understanding and to build memory. Much time is devoted to reading and analyzing Greek text; thus reinforcing grammatical learning with practical experience. This stands in contrast to the linear method, found in most Greek textbooks, which takes a slower approach by spreading exposure to the grammar over the whole learning period, but then suffers from a lack of sufficient practise in Greek text. The structure of this textbook needs to be understood from the

perspective of its teaching methodology. In addition to the spiral methodology, this textbook offers a number of useful pedagogical features. \* Clear advice on the most important learning at every stage. \* Immediate use of the Greek New Testament text. \* Focus on transfer of learning rather than excessive memorization. \* Explanation of English grammar at relevant points. \* Special techniques and descriptions to aid learning. \* Vocabulary learning based on word frequency. \* Adaptability to various course structures. This book offers a fresh methodology to teaching Greek, born of much experience and success in the classroom. It blends deductive and inductive instruction together efficiently to make learning Greek manageable and enjoyable.
