Discover how math applies to science, art, music, daily life, and more! Apply what you're learning outside a textbook, and see God's handiwork in math! Focus is on multiplication, division, fractions, decimals, ratios, percentages, shapes, basic geometry, and more! Math is a real-life tool that points us to God and helps us explore His creation, yet it often comes across as dry facts and meaningless rules. Here at last is a curriculum that has a biblical worldview integrated throughout the text and problems, not just added as an afterthought. Students don't just learn how to manipulate numbers on paper, but starting with arithmetic and laying the groundwork for geometry and algebra (covered in year 2), this curriculum both firms up the foundational concepts and prepares students for upper-level math in a logical, step-by-step way that helps students understand concepts, build problem-solving skills, and see how different aspects of math connect.
