Student Retention Literature - Tinto's Model | Cornelia

Cognitive behavioral therapy (CBT) is a psycho-social intervention that aims to improve mental health. CBT focuses on challenging and changing unhelpful cognitive distortions (e.g. thoughts, beliefs, and attitudes) and behaviors, improving emotional regulation, and the development of personal coping strategies that target solving current problems. . Originally, it was designed to treat

The Think CBT Workbook | Free Cognitive Behavioural

Cognitive decline, specifically memory loss alone, is not sufficient to diagnose dementia. There needs to be an impact on daily functioning related to a decline in the ability to judge, think, plan and organise. There is an associated change in behaviour such as emotional lability, irritability, apathy or coarsening of social skills.

Action for Happiness

Motivational Interviewing (MI), a counseling style initially used to treat addictions, increasingly has been used in health care and public health settings. This manuscript provides an overview of MI, including its theoretical origins and core clinical strategies. We also address similarities and differences with Self-Determination Theory. MI has been defined as person-centered method of

The Cognitive Behaviour Counselling Primer

CBT can help you to change how you think ('Cognitive') and what you do ('Behaviour'). These changes can help you to feel better. Unlike some of the other talking treatments, it focuses on the 'here and now' problems and difficulties. Instead of focusing on the causes of your distress or symptoms in the past, it looks for ways to improve your

The tricky issue of consent in adolescent mental health

As I stated previously, in the field of academic student retention literature Tinto’s model is held in high regard and is the most highly respected model (Kember 1995), providing a heuristic and theoretical framework for understanding student behaviour (Tinto 1975; Tinto 1982; Tinto 1987; Tinto 1993). According to Tinto’s theory the
