The golden thread that cuts across the various chapters of the book is the emphasis that good constitutions anchor certain tenets that have garnered recognition as hallmarks of democratic dispensation. These hallmarks include the concept of separation of powers; the doctrine of the rule of law; constitutionalism and human rights. These attributes have largely been secured by the 2010 Constitution. Thus, this book is expected to contribute to this new promise by making knowledge on the Constitution accessible through breaking down and contextualising its provisions. It is certain to be useful to law and government students, lawyers, researchers and other persons who seek to understand the new constitutional order.

## **Kenya National Assembly Official Record (Hansard)**

The collaborative efforts of ColombiaA's Department of National Planning (DNP) and the World Bank has produced the National Evaluation System of Public Sector Performance (SYNERGY). Put in place by the Special Division for Evaluation in DNP, this system has been designed and implemented to change the public sector from an inward-looking, process-oriented body (which sometimes restrains economic and social progress) into a more dynamic, results-oriented partner of the community and private sector in development. This report explores the critical factors in making SYNERGY a successful evaluation system.

Such factors include ways of making it an effective management tool, promoting civil society participation by focusing on results for people and leveraging on their energy and resource, defining a constructive learning process for implementation, and providing an enabling environment for a results-oriented public sector.

### **Government and Labour in Kenya 1895-1963**

Kenya's economy is bouncing back following multiple shocks between 2008 and 2009. The program targets a gradual reduction in the central government primary balance through tax reform and strict control of current spending to bring the debt-to-GDP ratio below 45 percent at the end of the program period. Tax policy reform will focus on the VAT, streamlining tax incentives, and eliminating loopholes. Kenya has made significant strides in domestic revenue mobilization, but redesigning the tax structure is a key priority.

### **Report of the Public Accounts Committee on the Government of Kenya Accounts for the Year**

Based on a survey of 781 establishments, this book sheds light on some of the most important policy issues required to put Kenya on a higher growth path. It highlights the challenges that the country's businesses face today and what government can do to overcome such obstacles.

## **New Constitutional Law of Kenya**

### **Report to the Government of Kenya on Co-operative Education and Training**

The path towards democracy in Kenya has been long and often tortuous. Though it has been trumpeted as a goal for decades, democratic government has never been fully realised, largely as a result of the authoritarian excesses of the Kenyatta, Moi and Kibaki regimes. This uniquely comprehensive study of Kenya's political trajectory shows how the struggle for democracy has been waged in civil society, through opposition parties, and amongst traditionally marginalised groups like women and the young. It also considers the remaining impediments to democratisation, in the form of a powerful police force and damaging structural adjustment policies. Thus, the authors argue, democratisation in Kenya is a laborious and non-linear process. Kenyans' recent electoral successes, the book concludes, have empowered them and reinvigorated the prospects for democracy, heralding a more autonomous and peaceful twenty-first century.

### **Support for Growth-oriented, Women Entrepreneurs in Kenya**

This book explores how rise of NGOs in developing countries has affected service provision, governance, state-society relations, and state development.

Kenya is a country of geopolitical and economic importance in East Africa. It shares borders with unstable states such as Somalia and Sudan while being a hub for trade, communication, finance, and transportation across the region. Although relatively stable since its independence in 1963, the country still faces poverty, inequality, and corruption. In addition, the contested election of 2007 led to severe ethnic strife that tested its political stability, leading to a new constitution in 2010. This unique survey by a leading expert on the region provides a critical analysis of the socio-economic development in Kenya from a political economy perspective. It highlights Kenya's transition from being a centralized state to having a clear separation of powers and analyzes key

issues such as economic growth, urbanization, corruption, and reform. The book identifies Kenya's key socio-development problems and offers solutions to improve both governance and economic performance, making it an essential resource to researchers, academics, and policy makers working on development issues and African politics.

This timely and important work studies Kenya's small scale manufacturers. What makes the book unique is Gray's sub-sector approach, which focuses on the particular industries of tailoring, woodwork and metalwork. Gray investigates the development of these sub-sectors by taking a strategic management approach. Such an approach allows the author to assess enterprise competitiveness and profitability within industries. Readers will find that the information in this book serves as a well-needed supplement to the literature on the World Bank's July 1995 decision to focus more on micro-enterprise development. The book will appeal to many different audiences including development agencies concerned with the economic development community and the international academic community. Business and social science students who are interested in how work is organized in the family and the effects of modernization on traditional society will also benefit from reading this book.

The global phenomenon of school decentralization is a highly political process. It involves substantial shifts in power, affecting the influence and livelihood of groups such as teachers and their unions. School systems are also vehicles for enhancing political influence and carrying out the programs and objectives of those in power. This report identifies the political dimensions of school decentralization and discusses the methods and problems of building a broad public consensus to support it. Country case studies and examples of best practices are provided.

## **Review of Early Childhood Policy and Programs in Sub-Saharan Africa**

The African Development Bank's (AfDB) Addis Ababa Forum in June 2003 focused on the role of women entrepreneurs in private sector development, poverty reduction, and sustainable growth and development. It provided an opportunity for the AfDB and the International Labour Office (ILO) to join forces using their complementary expertise in support of women-owned businesses in Tanzania, Ethiopia and Zambia. This report is based on the country assessment for Kenya, where the ILO has been researching and supporting women's entrepreneurship. Examining such issues as the economic context, micro-finance.

### **Self Reliance in Kenya**

Efficient delivery of public services in Africa and other developing regions has for a long time been hindered by highly centralized government bureaucracies (Mwabu et al., 2001). In Kenya, several efforts have been made to reduce unnecessary layers of government to make service provision to the populace more effective. This book reports on recent decentralization and devolution innovations in Kenya. The volume is organized into three parts and contains a total of 12 chapters including the introduction. The chapters in Part 1 (Structures and Institutions) provide a comprehensive analysis of institutional and organizational environment in which decentralization and devolution reforms have been taking place over the last three decades. Part 2 (Principles and

Processes) contains chapters that clarify decentralization and devolution concepts, with applications to selected local authorities. The chapters in Part 3 (Service Delivery and Financing) illustrate advantages of provision and financing of services at the local level, with a focus on the role of community participation in improving accountability and efficiency in resource use.
