Eco-nomics

In this collection of articles, the authors address topics such as sharing the care of infants and toddlers, conferencing with families, acknowledging culture, promoting inclusion, and helping families to support learning at home. The book includes a list of key resources as well as questions and activities designed to aid readers in reflecting on the articles.

Style and Socialism

This fascinating book takes as its premise the notion that material culture can help explain the experience of state socialism as lived by ordinary people in Eastern Europe. It provides a revealing window through which to examine the interaction between official state rhetoric and state command on the one hand, and the popular applications of the state's material products on the other. From street fashion to modern art, from the design of state buildings to wallpaper, interconnections between politics and ideology, cultural policy formation and consumption are shown to be a matter of complex negotiation.

Paranormal romance is a supernatural force to be reckoned with. Although packed with a menagerie of werewolves, shapeshifters and assorted demons, its undisputed king is none other than our favourite centuries-old bloodsucker - the vampire. We're now living in a post-Buffy world of dark urban fantasy à la Laurell K. Hamilton's Anita Blake, Sherrilyn Kenyon's irresistible Dark Hunters and the blood-lusting soul mates of Christine Feehan. But it doesn't stop there. This Mammoth collection opens a vein to reveal the mind-boggling scope of the supercharged phenomenon created when vampires met romance. Let the biggest and brightest names in the paranormal romance business take you hot on the haemoglobin trail of the sexiest creatures of the night. Witness the bewildering array of complex vampire codes of conduct, dark ritual and dating practices, as they chat up the locals and engage in the most erotic encounters you will sink your teeth into this side of un-Death. These ain't your mother's vampires!

Drawing Upon Art for Gardner S Art Through the Ages: A Concise Global History, 2nd

On the night of November 9, 1989, massive crowds surged toward the Berlin Wall, drawn by an announcement that caught the world by surprise: East Germans could now move freely to the West. The Wall—infamous symbol of divided Cold War Europe—seemed to be falling. But the opening of the gates that night was not planned by the East German ruling regime—nor was it the result of a bargain between either Ronald Reagan or George H.W. Bush and Soviet leader Mikhail

Gorbachev. It was an accident. In *The Collapse*, prize-winning historian Mary Elise Sarotte reveals how a perfect storm of decisions made by daring underground revolutionaries, disgruntled Stasi officers, and dictatorial party bosses sparked an unexpected series of events culminating in the chaotic fall of the Wall. With a novelist's eye for character and detail, she brings to vivid life a story that sweeps across Budapest, Prague, Dresden, and Leipzig and up to the armed checkpoints in Berlin. We meet the revolutionaries Roland Jahn, Aram Radomski, and Siggie Schefke, risking it all to smuggle the truth across the Iron Curtain; the hapless Politburo member Günter Schabowski, mistakenly suggesting that the Wall is open to a press conference full of foreign journalists, including NBC's Tom Brokaw; and Stasi officer Harald Jäger, holding the fort at the crucial border crossing that night. Soon, Brokaw starts broadcasting live from Berlin's Brandenburg Gate, where the crowds are exulting in the euphoria of newfound freedom—and the dictators are plotting to restore control. Drawing on new archival sources and dozens of interviews, *The Collapse* offers the definitive account of the night that brought down the Berlin Wall.

The Collapse

A history of early space flight focuses on the careers of both American astronauts and Soviet cosmonauts and includes coverage of other persons who worked in support roles.

The Blasphemer

"The Maid" and "The Hangman"

From the Preface: Bristol is the city that John Cabot sailed from and Thomas Chatterton dreamed, that Hugh Latimer preached to and Oliver Cromwell seized, that entertained Parliaments in the Middle Ages and rioted for Reform in the nineteenth century. Since the Norman Conquest, it has always had an important place in English history, experiencing events and contributing to developments that stirred the nation. What follows is an account of its connection with one small piece of that history, the rise of the Atlantic economy in the early modern period and the accompanying transformation of English economic ideas and practices. But this book is not about economics alone. It is grounded on the belief that we can no more abstract the economy from politics, culture, and society than we can separate intentional human action from thought and judgment. It also rejects the notion that the life of a city like Bristol could ever be treated as a self-contained whole. Instead it views such cities as social organisms living in close relationship with their surroundings. What gives them their structure is the set of internal codes they carry. And what enables them to survive is their ability to adapt to or transform their environment, which itself is always changing.

The Crystal Fix

Many parts of the world suffer from urban air pollution and, despite the vast amount of knowledge about its causes, most countries are slow to implement counter-measures. An outstanding exception is Tokyo which, once blanketed in a mantle of smog, now enjoys ``clean" air in spite of highly concentrated activity and congested traffic. Based on the successful Japanese experience, this book describes all aspects of the measures necessary to combat air pollution. It begins with a well-documented history of the fight against air pollution and describes the processes and mechanisms of reaching a social consensus on pollution control. The essential steps in the process are the establishment of ambient air quality standards, the introduction of the total allowable mass of emission, and the legal control of each emission based on diffusion equations. The scientific background to this approach is fully explained, from epidemiology to computer simulations of air

quality. An up-to-date account of emission control technology is also given, and the controversial issue of health damage compensation is examined, based on actual experience. An important feature of the book is that it is written by authors who were actually in the forefront of the battle against air pollution in Japan. Two of them worked successively as Director General of the Bureau of Air Quality of the central government, and a third helped local governments to force the central government to implement the most stringent auto-emission controls in the world. The book is intended not only for scientists, engineers and administrative planners dealing with pollution control, but also for anyone concerned about the serious global problem of urban air pollution.

The Widening Gate

It's one thing to be passionate about protecting the environment. It's another to be successful at it. Many laws have been enacted to clean up pollution or preserve natural beauty, but many of them don't work and other have unintended consequences. In this book, Stroup explains why many of our environmental laws have failed us and how we might go about doing a better job of protecting nature. Eco-nomics is an indispensable guide to learning how to think about both economics and the environment.

Corvette

Here is the book that exposed the Daimler-Chrysler "merger of equals" as a bold German takeover of an industrial icon. Taken for a Ride reveals the shock waves felt around the world when Daimler-Benz bought Chrysler for \$36 billion in 1998. In a gripping narrative, Bill Vlasic and Bradley A. Stertz go behind the scenes of the defining corporate drama of the decade -- and in a new epilogue chart its chaotic aftermath.

It is the ancient days of the Persian Empire. Hadassah was content in her quiet life in the Jewish quarter of the city of Babylon with her uncle Mordecai, who had raised her from childhood. But she was old enough to be married, and yet her uncle hadn't arranged a marriage for her. Meanwhile in Shushan, King Ahasuerus' marriage to the vain and selfish Vashti has ended, and a new wife must be found. Why not bring to him the most beautiful women of the kingdom, and let him choose? And so the loveliest young women of the empire are selected in local contests, and Hadassah is among those chosen to go to Shushan to meet the King. But as a Jewess in a foreign land with powerful enemies to her faith, she must conceal her true identity and take the Babylonian name of Esther. Will she find love with a man she has never met? And can she survive in a strict royal court controlled by the evil prime minister Haman, who wants to destroy her people?-Print ed.

The Mammoth Book of Vampire Romance

As in many other design fields of the twentieth century, the automobile industry boasts models that have become archetypes of modernity: the Volkswagen Beetle and the Golf by Giugiaro, the Fiat 500, the great sports cars designed first by Pininfarina for Ferrari, and the Mini Minor by Issigonis. Twenty-first century prototypes also have this mix of design and technological innovation making them marvels of contemporary life. This catalogue brilliantly illustrates the extraordinary creative life of the most prestigious European and American car manufacturers and their models which, from the end of the 1940s to the present day, created a sensation and became design icons. It offers an in-depth examination of some of the most iconic models in the history of the automobile and examines themes such as the sports car and the design process, and technological innovations. From the creative process to the making of timeless models, this publication presents the cult and culture of cars in all its glory.

Over 75,000 coins have been found during excavations at the Agora, many minted in the city but others brought from

Athens's far-flung commercial contacts. In addition to the mostly bronze and copper coins themselves, a building that may have served as the Athenian mint is described in this booklet. After describing the physical techniques of production, the author takes a chronological approach and includes numerous black and white photographs, making this concise guide a useful aid to the identification of lower-value Greek and Roman coinage.

The Various Writings of Cornelius Mathews

An explorer of linguistics as well as a mathematician, he often combined his love of both subjects such that the essence of his writings resides not in its "content" but in the sounds and the form of the text. He often argued that the real subject of his work is language itself. Because of this many of his novels, and especially his poems, are virtually impossible to translate into English as they are based on spoken versus literary French, puns, street slang, and complex variations of word play and spelling. *Les Ziaux (Eyeseas)* presents a survey of his poems as written from his early Surrealist days of the 1920's through to 1943 and is representative of Queneau's range of poetic voices."--Jacket.

Legends of the Open Road

The Gallagher Brothers series from NYT Bestselling Author Carrie Ann Ryan continues with the one brother who thinks he can handle it all and the one woman who could change that. Owen Gallagher likes everything in its place and is organized to a fault. While his brothers have each dealt with their own personal tragedies and stresses, Owen figures he's had it pretty easy. That is until his perfectly ordered world is rocked at its foundation and he's forced to rely on others. Now, he must heal his body and his soul while trying to ignore his delectable and utterly off-limits neighbor. Liz McKinley is stressed out, exhausted, and not in the mood for a bearded and growly man in her ER. When she patches him up to the best of his ability, she's prepared to push him firmly from her thoughts. Of course, that would be easier if she and her best friend hadn't bought the house next to his. Now their paths seem to cross daily, and she is finding it harder and harder to say no to the injured and angry man next door. But she's been scarred one too many times in her life, and even though this Gallagher looks good enough to eat, she knows that sometimes, sating that craving is the worst thing she can do.
