Mechanics, relativity, non-Euclidean geometries, non-Aristotelian logic and General Semantics, the scientific view of the world has changed dramatically from just a few decades ago. Nonetheless, human thinking is still deeply rooted in the cosmology of the middle ages. This is the book to change your way of perceiving yourself -- and the universe. Some say it's materialistic, others call it scientific and still others insist it's mystical. It is all of these -- and none. The book for the 21st Century, complete with exercises. Picks up where "Prometheus Rising" left off. Some say it's materialistic, others call it scientific and still others insist it's mystical. It is all of these -- and none.

Economic collapse, poverty, disease, natural disasters, the constant threat of community unrest and international terrorism--a quick look at any newspaper is enough to cause almost anyone to feel trapped and desperate. Yet the recent election also revealed a growing search for hope spreading through society. In the timely *Hope in the Age of Anxiety*, Anthony Scioli and Henry Biller illuminate the nature of hope and offer a multitude of techniques designed to improve the lives of individuals, and bring more light into the world. In this fascinating and humane book, Scioli and Biller reveal the ways in which human beings acquire and make use of hope. *Hope in the Age of Anxiety* is meant to be a definitive guide. The evolutionary, biological, and cultural roots of hope are covered along with the

seven kinds of hope found in the world's religions. Just as vital, the book provides many personal tools for addressing the major challenges of the human condition: fear, loss, illness, and death. Some of the key areas illuminated in *Hope in the Age of Anxiety*: How do you build and sustain hope in trying times? How can hope help you to achieve your life goals? How can hope improve your relationships with others? How can hope aid your recovery from trauma or illness? How does hope relate to spirituality? *Hope in the Age of Anxiety* identifies the skills needed to cultivate hope, and offers suggestions for using these capacities to realize your life goals, support health and healing, strengthen relationships, enhance spirituality, and inoculate yourself against the despair that engulfs many individuals.

A Guide to Trance Land: A Practical Handbook of Ericksonian and Solution-Oriented Hypnosis

This text presents a new approach to the use of hypnotic suggestion. For years, hypnotherapists have used scripts which are aimed at a particular problem, like

smoking or weight loss, rather than aiming at the client who smokes or has weight issues. Trevor Silvester suggests that it is not the problem that is the problem; it's the client's unique relationship with the problem that's the problem. The book aims to free you from the constraints of scripts and enable you to use your creative skill to weave subtle spells that empower your clients by changing their model of reality. It presents the science behind suggestion, and the means of using that science to create magical ways of influencing others.

Monsters & Magical Sticks

Normal human development progresses through a process of differentiation and integration, and it is distorted and impeded by the fusion and fragmentation resulting from traumatic experiences. *The Impact of Complex Trauma on Development* documents the pathological consequences of chronic interpersonal trauma on psychological development, behavior, and interpersonal relationships. It provides an integrative approach to therapy that is based on a rich psychoanalytically-oriented developmental psychology.

Handbook Of Hypnotic Phenomena In Psychotherapy

A gripping thriller about a man's quest for the daughter no one else believes is still

alive, from the acclaimed author of *The Chalk Man* and *The Hiding Place*. An ID Book Club Selection • “C. J. Tudor is terrific. I can’t wait to see what she does next.”—Harlan Coben, #1 New York Times bestselling author

Q: Why are you called the Other People? A: We are people just like you. People to whom terrible things have happened. We’ve found solace not in forgiveness or forgetting. But in helping each other find justice. Driving home one night, stuck behind a rusty old car, Gabe sees a little girl’s face appear in its rear window. She mouths one word: Daddy. It’s his five-year-old daughter, Izzy. He never sees her again. Three years later, Gabe spends his days and nights traveling up and down the highway, searching for the car that took his daughter, refusing to give up hope, even though most people believe she’s dead. When the car that he saw escape with his little girl is found abandoned with a body inside, Gabe must confront not just the day Izzy disappeared but the painful events from his past now dredged to the surface.

Q: What sort of justice? A: That depends on the individual. But our ethos is a punishment that fits the crime. Fran and her daughter, Alice, also put in a lot of miles on the road. Not searching. Running. Because Fran knows what really happened to Gabe’s daughter. She knows who is responsible. And she knows what they will do if they ever catch up to her and Alice.

Q: Can I request to have someone killed? A: If your Request is acceptable, and unless there are exceptional circumstances, we fulfill all Requests.

Experiencing Erikson

This wonderful book is for anyone interested in making their life significantly better. It is a goldmine of insights and techniques from one of the greatest geniuses of personal change. As you use the techniques in this book, you will exponentially increase your ability to make dramatic life-enhancing differences. It is by far one of the most entertaining and professionally stimulating books I have read. It will change your life!"--Paul McKenna, Ph.D, author of I Can Make You Thin and host of The Learning Channel's I Can Make You More than thirty years ago, Richard Bandler set out to discover how some therapists managed to effect startling change with their clients, while others were arguing about theories as their face patients waited in vain for help. Now widely regarded as the world's greatest hypnotist, Richard Bandler observed and developed patterns which became the foundation of neuro-linguistic programming (NLP), arguably one of the most profoundly effective approaches for self-development and change. Since coauthoring the internationally influential books, The Structure of Magic Volume 1, and Patterns of the Hypnotic Techniques of Milton Erickson, M.D. Volume 1, Bandler has traveled the world, honing his skills and helping people solve problems and achieve goals when other "experts" have been unable to help. Richard Bandler's Guide to TRANCE-formation, he returns to his roots: hypnotic phenomena, trancework, and altered states to provide a highly compelling prescription for personal change. According to Bandler, "trance" is at the very foundation of human experience. People are not simply in or out of trance, but are

moving from one trance to another. They have their work trances, their relationship trances, their driving trances, and their parenting trances. Some of these states are useful and appropriate; others are not. With his signature wit and contrarian approach to therapy, Bandler shows how anyone can reset or reprogram problem behaviors to desired alternatives, with lasting and life-altering results. Peppered with case studies and more than thirty exercises, Richard Bandler's Guide to TRANCE-formation, is an intriguing, engaging, and often amusing, read for anyone, whether they are new to NLP, want to further their NLP training, or simply want to make a positive difference in their own lives.

Trances of the Blast

John Bradshaw is arguably the most accomplished and well-known leader alive today in the addictions field. He taught us about functional and dysfunctional families, showed us how shame could become toxic and poisonous to our core selves, and helped us understand and heal the wounded, vulnerable "inner child" conceived by, and thriving in, that environment. In Post-Romantic Stress Disorder (PRSD), Bradshaw gives readers a clear explanation of the difference between falling in love, lust, and true love. Based on his research, PRSD is a deeply serious psychological disorder and the cause of 40% of all divorces -divorces that could have been prevented. Every day people throw away perfectly good relationships because they just don't know how to navigate the tides, but if they could learn and

understand the concepts Bradshaw presents in this book, the portrait of the family unit could have a whole new landscape. Join this great teacher as he opens the gates to a new frontier, tackling issues that threaten and endanger so many modern relationships. Be encouraged as he leads the way to a deeper and more fulfilling spiritual union. As he so eruditely observed some time ago, "As the health of the marriage goes, so goes the health of the family." Yet Bradshaw ladles out hope unlimited?if parents could restore a deep, authentic love for each other it could be passed on to their children and families would actually flourish.

Richard Bandler's Guide to Trance-formation

Unrealistic expectations are the culprit in relationship problems. Dr. Wolinsky looks at the root causes of unrealistic expectations: separation, resistance to separation, and desire for merger. It is the unresolved resistance to separation which leads people to expect partners to act as parents and fulfill past-time needs in the present. The further extension of this subconscious demand is not "seeing" or experiencing the partner as a human being in the present.

And How Are You, Dr. Sacks?

A friendly and brief guide to the essentials of hypnosis. Popular author Bill O'Hanlon offers an inviting and reassuring guide to the essentials of hypnosis, alleviating the newcomer's anxieties about how to make the most of this clinical tool. This brief book illustrates the benefits of solution-oriented hypnosis, which draws on the work of the pioneering therapist Milton Erickson (with whom O'Hanlon

studied) and emphasizes doing what is needed to get results—which, more often than not, means trusting that the client holds within him- or herself answers or knowledge that need only be tapped or released by the therapist. O’Hanlon covers the key aspects of hypnosis, including: using possibility words and phrases; using passive language; and inducing trance. O’Hanlon offers practical tips and friendly encouragement for the novice hypnotherapist—in his characteristic warm, reassuring, and humorous style.

Generative Trance

Despite their clinical utility, hypnotic phenomena are vastly underutilized by therapists in their work with patients. Whether this is due to uncertainty about how to use specific techniques constructively or how to elicit particular phenomena, or anxiety about not being able to obtain a desired result, this volume will guide hypnotherapists toward higher levels of clinical expertise. By describing varied hypnotic phenomena and how they can be used as vehicles of intervention, *The Phenomenon of Ericksonian Hypnosis* takes the therapist beyond these fundamental applications toward a broader, more sophisticated scope of practice. This immensely readable book addresses the selection, eliciting, and therapeutic use of hypnotic phenomena that are natural outgrowths of trance. It offers step-by-step instruction on eliciting age progression, hypnotic dreaming, hypnotic deafness, anesthesia, negative and positive hallucination, hypermnesia, catalepsy,

and other hypnotic phenomena. The book includes specific instruction on how to use the phenomena manifested in trance to provide more effective treatment. Numerous case examples vividly illustrate intervention with anxiety disorders, trauma and abuse, dissociative disorders, depression, marital and family problems, sports and creative performance, pain, hypersensitivity to sound, psychotic symptomatology, and other conditions. The Phenomenon of Ericksonian Hypnosis will be used by therapists as a valuable clinical tool to expand their conceptualizations of hypnosis, and thus enable them to offer a wider repertoire of skills with which they can confidently treat clients.

The Way of the Human

This book describes an entirely new way of conducting hypnotherapeutic interventions - Stephen Gilligan's generative trance. The first generation of trance work, the traditional hypnosis that still holds sway in most places, considers that both the conscious mind and the unconscious mind of the client are, to put it bluntly, idiots. So trance work involves first 'knocking out' the conscious mind and then talking to the unconscious mind like a 2-year old that needs to be told how to behave. Milton Erickson created the second generation of trance work. He approached the unconscious as having creative wisdom and each person as extraordinarily unique. Thus, rather than trying to programme the unconscious with new instructions, Erickson saw trance as an experiential learning state where

a person's own creative unconscious could generate healing and transformation. At the same time Erickson, for the most part, carried the same low opinion of the conscious mind. Thus, Ericksonian hypnosis looks to bypass the conscious mind with indirect suggestions and dissociation and depotentiate it with confusion techniques.

Trance-Portation

"From the author of the acclaimed I Am Having So Much Fun Here Without You, a satirical and moving novel in the spirit of Maria Semple and Jess Walter about a New York City trend forecaster who finds herself wanting to overturn her own predictions, move away from technology, and reclaim her heart. Sloane Jacobsen is the most powerful trend forecaster in the world (she was the foreseer of "the swipe"), and global fashion, lifestyle, and tech companies pay to hear her opinions about the future. Her recent forecasts on the family are unwavering: the world is over-populated, and with unemployment, college costs, and food prices all on the rise, having children is an extravagant indulgence. So it's no surprise when the tech giant Mammoth hires Sloane to lead their groundbreaking annual conference, celebrating the voluntarily childless. But not far into her contract, Sloane begins to sense the undeniable signs of a movement against electronics that will see people embracing compassion, empathy, and "in-personism" again. She's struggling with the fact that her predictions are hopelessly out of sync with her employer's mission

and that her closest personal relationship is with her self-driving car when her partner, the French "neo-sensualist" Roman Bellard, reveals that he is about to publish an op-ed on the death of penetrative sex--a post-sexual treatise that instantly goes viral. Despite the risks to her professional reputation, Sloane is nevertheless convinced that her instincts are the right ones, and goes on a quest to defend real life human interaction, while finally allowing in the love and connectedness she's long been denying herself. A poignant and amusing call to arms that showcases her signature biting wit and keen eye, celebrated novelist Courtney Maum's new book is a moving investigation into what it means to be an individual in a globalized world"--

Creating Love

My undergraduate training has been in the field of Physical Therapy, but like many of you I have been participating in the 'school of life' much longer! As you incorporate the basic techniques included in this book into whatever your current healing practice is, hopefully you too will experience the reward and joy of watching people change and heal themselves as I have. Following are the basic principles that have emerged for me through the years: Our bodies are all one piece, and what affects any part of it affects the whole. All layers of the body must be released to allow for full release of the whole body. As parts of the body release and physical mobility changes, mental and emotional agility increases. To maintain these changes, the central nervous system has to realize the new possibilities for movement and incorporate them into natural motor patterns. To maintain the physical changes and new natural motor patterns, the energetic body must change to reflect the physical changes. As parts of the body release, energy releases and flows more freely throughout the entire body. As energy releases, memories emerge for integration into consciousness and subsequent healing of past traumas. As physical and energetic changes occur, belief systems shift. As individual's belief systems shift, societal paradigms shift. This is a wholistic model that I am calling MultiDimensional Healing. Come join me on this exciting journey of discovering your unlimited potential for facilitating healing for yourself, your clients, your community, the world! Respectfully submitted, Carrie Cameron

The Tao of Chaos

Covering leadership in the arts and humanities, this volume integrates critical theory with authentic leadership development, exploring the notion that leadership is both a discursive practice and a performative identity. Each year the International Leadership Association publishes a book that captures the best contemporary thinking about leadership from a diverse range of scholars, practitioners, and educators working in the field of leadership studies. In keeping with the mission of the ILA, the International Leadership Series Building Leadership Bridges connects ways of researching, imagining, and experiencing leadership across cultures, over time, and around the world. Praise for *The Embodiment of Leadership* "Read this book to experience an artistic and more robust sense of leadership; to rise to the challenge to gain alignment in mind, body, and spirit; and to heed the call to heal the shadows we as leaders sometimes cast over our collective humanity. Read this book to become more whole." —Shann Ray Ferch, professor of leadership studies, Gonzaga University "For once leadership experts consider the mind-body problem from the perspective of the latter—the

body. Those with an interest in how the body is brought to bear on the exercise of leadership would do well to explore *The Embodiment of Leadership*." —Barbara Kellerman, James MacGregor Burns Lecturer in Public Leadership, John F. Kennedy School of Government, Harvard University "The Embodiment of Leadership goes beyond the banal by using our body experiences as the point of departure in deciphering the leadership conundrum. Anyone interested in the study of leadership would do well to pay attention to this book." —Manfred F. R. Kets de Vries, Distinguished Clinical Professor of Leadership and Organizational Change, The Raoul de Vitry d'Avaucourt Chaired Professor of Leadership Development, INSEAD "Leadership is a social construction. *The Embodiment of Leadership* presents a multifaceted approach to understanding how we, as a society, define, create, and contend with leaders and leadership. Serious scholars and students of leadership need to read this." —Ronald E. Riggio, Kravis Leadership Institute, Claremont McKenna College

Shamanic Trance in Modern Kabbalah

1974: A tiny band of self-styled urban guerrillas, calling itself the Symbionese Liberation Army, abducts a newspaper heiress, who then abruptly announces that she has adopted the guerrilla name "Tania" and chosen to remain with her former captors. Has she been brainwashed? Coerced? Could she be sincere? Why would such a nice girl disavow her loving parents, her adoring fiancé, her comfortable

home? Why would she suddenly adopt the SLA's cri de coeur, "Death to the Fascist Insect that Preys Upon the Life of the People"? Soon most of the SLA are dead, killed in a suicidal confrontation with police in Los Angeles, forcing Tania and her two remaining comrades--the pompous and abusive General Teko and his duplicitous lieutenant, Yolanda--into hiding, where they will remain for the next sixteen months. Trance, Christopher Sorrentino's mesmerizing and brilliant second novel, traces this fugitive period, leading the reader on a breathtaking, hilarious, and heartbreaking underground tour across a beleaguered America, in the company of scam artists, visionaries, cultists, and a mismatched gang of middle-class people who typify the guiding conceit of their time, that of self-renovation. Along the way he tells the story of a nation divided against itself--parents and children, men and women, black and white; a story of hidebound tradition and radical change, of truth and propaganda, of cynicism and idealism; a story as transfixing and relevant today as it was then. Insightful, compassionate, scathingly funny, and moving, Trance is a virtuoso performance, placing Christopher Sorrentino in the first rank of American novelists. Trance is a 2005 National Book Award Finalist for Fiction.

A Buddhist monk takes up arms to resist the Chinese invasion of Tibet - then spends the rest of his life trying to atone for the violence by hand printing the best

prayer flags in India. A Jain nun tests her powers of detachment as she watches her best friend ritually starve herself to death. Nine people, nine lives; each one taking a different religious path, each one an unforgettable story. Hearts on Fire

The ability to move from the ordinary into an altered state of consciousness is one of the most valuable skills in both magic and religion. From the ceremonial magician to the shaman, using trance work to explore inner realms is essential to the magical process of healing, transcendence, and wisdom desired throughout diverse occult and spiritual traditions. Trance-Portation offers a comprehensive and multi-spirited way to enter the inner realm. Blending the modern world with the ancient arts, Trance-Portation's first three chapters, Travel Planning, Crossing the Threshold, and Getting Started, offer preparatory suggestions including meditations and relaxations, breathing, warding, shifting gears, and returning. Drawing on examples from varied traditions, from Western Mystery to Native American, Ancient Celtic to Eastern Mysticism, and peppered with folk lore and tales from popular science fiction stories, Trance-Portation explores spiritual journey work extensively, offering readers the chance to find their own ways into

the inner realm, encounter their own guides and fellow travelers, and create divine relationships with the deities and gods and goddesses that they meet.

Post-Romantic Stress Disorder

The untold story of Dr. Oliver Sacks, his own most singular patient "[An] engrossing biographical memoir. This is Sacks at full blast: on endless ward rounds, observing his post-encephalitic patients . . . exulting over horseshoe crabs and chunks of Iceland spar." —Barbara Kiser, *Nature* The author Lawrence Weschler began spending time with Oliver Sacks in the early 1980s, when he set out to profile the neurologist for his own new employer, *The New Yorker*. Almost a decade earlier, Dr. Sacks had published his masterpiece *Awakenings*—the account of his long-dormant patients' miraculous but troubling return to life in a Bronx hospital ward. But the book had hardly been an immediate success, and the rumpled clinician was still largely unknown. Over the ensuing four years, the two men worked closely together until, for wracking personal reasons, Sacks asked Weschler to abandon the profile, a request to which Weschler acceded. The two remained close friends, however, across the next thirty years and then, just as Sacks was dying, he urged Weschler to take up the project once again. This book is the result of that entreaty. Weschler sets Sacks's brilliant table talk and extravagant personality in vivid relief, casting himself as a beanpole Sancho to Sacks's capacious Quixote. We see Sacks rowing and ranting and caring deeply; composing the essays that would form *The*

Man Who Mistook His Wife for a Hat; recalling his turbulent drug-fueled younger days; helping his patients and exhausting his friends; and waging intellectual war against a medical and scientific establishment that failed to address his greatest concern: the spontaneous specificity of the individual human soul. And all the while he is pouring out a stream of glorious, ribald, hilarious, and often profound conversation that establishes him as one of the great talkers of the age. Here is the definitive portrait of Sacks as our preeminent romantic scientist, a self-described “clinical ontologist” whose entire practice revolved around the single fundamental question he effectively asked each of his patients: How are you? Which is to say, How do you be? A question which Weschler, with this book, turns back on the good doctor himself.

The Power of Ecstatic Trance

What Is Remembered Lives

The founder of Quantum Psychology and author of "Trances People Live, " "Quantum Consciousness, " "The Dark Side of the Inner Child, " and "The Tao of Chaos, " reveals over 75 of the meditation techniques which are the cornerstone of Quantum Psychology -- powerful, effective tools for transforming and mastering negative and limiting patterns of behavior. The book is divided into various types

of self-work, with explanations and examples drawn from Dr. Wolinsky's experiences with students, individually and classes.

Touch

Focuses on the False Core, that one conclusion you make about yourself which organizes not only your entire psychology but also how you imagine the world sees you, and the False Self, which compensates for this false conclusion. Volume II contains exercises, demonstrations, and protocols for dismantling the False Core-False Self Complex.

Ericksonian Approaches to Hypnosis and Psychotherapy

Training Trances is about how to therapeutically communicate with the unconscious mind. The authors present their own unique integration of Ericksonian techniques, traditional models of hypnotherapy, and recent research in related areas. Numerous new patterns modeled from the work of Milton H. Erickson, M.D. are clearly explained and demonstrated. The use of trance in training design, to unconsciously install the skills being taught to the participants, is also covered. The book developed from transcripts of a four day workshop, and the design of the book parallels the design chosen for the training itself. Individual exercises or

those done in groups of two or three are offered so that the reader may practice the techniques and learn the skills. There are numerous "live" demonstrations, inductions, and double inductions which create for the reader a real "feel" of how hypnosis is done and which are also a rich source for linguistic analysis for the advanced reader. Written with insight and humor, this book's most unique twist is its use of multi-level communication and hypnotic language to create a "training trance" for the readers as they journey through the text. Some hypnotic references are obvious and explicit -- those which are not obvious will create enjoyable "aha!" experiences for the reader as they are discovered.

It's an exceptionally well-written, well thought out, high-level work that gives the reader unique insights into how to capture a prospect's attention. Cutting-edge stuff that is a must for every serious marketer to absorb and implement." -Robert Ringer, author, *To Be or Not to Be Intimidated?: That Is the Question* "Vitale's understanding of how and why people think and act like they do is remarkable. By unscrambling complex ideas and explaining them in simple language, he reveals how to fashion messages that will turn people into compulsive buyers of our products and services. Now we can take control and create the buying trance. It's a totally refreshing and very effective approach to hugely profitable sales and marketing!" -Winston Marsh, veteran Australian marketer

His victims are powerless. He is in control. This is his revenge--and he's only just begun. Three university scientists are found dead in a gruesome murder-suicide, and the only suspect in the case, Victor Lazar, is quickly captured. When the spate of violent suicides follows him to prison he is moved to solitary confinement, reserved for the highest-risk inmates. And then his assigned psychologist

inexplicably takes his own life. Alex Madison, a former forensic psychologist turned private therapist, is brought in to interview Victor. He suspects that Victor is controlling his victims, somehow coaxing them into a suggestive trance. It seems like science fiction, but as Alex digs deeper he uncovers a frightening reality of secret research and cruel experimentation--and the perpetrators are closer to home than he could ever have imagined. Too late, Alex learns the true extent of what Victor is capable of--and who he's after. With everything he holds dear at risk, can Alex take control of a dangerous mind--before it takes control of him?

The Impact of Complex Trauma on Development

Ecstasy, or extasis, is the Greek term for trance, and is linked with a pleasurable, God-given state of out-of-body experience recorded throughout the New

Testament and the church age. Starting with the apostles ecstatic experiences on Pentecost, the Book of Acts further records trances in the lives of Peter and Paul. From the early church to the Christian mystics of the Middle Ages and the famous revivalists of centuries present, God's movements on the earth have always been marked by these supernatural experiences. In this book, John Crowder takes us on a journey from Old Testament ecstatic prophets such as Samuel and Elijah, to the future ecstasies who will usher in a massive wave of harvest Glory to the streets in these last days. God has always wanted a people who live in the Heavens, even as they walk on the Earth. And the world is hungry for the demonstration of a gospel of supernatural power that flows from a life of divine pleasure. More than a state of mind, you will see how the nature of God's ecstasy is found in the joy, bliss and inner raptures of His presence. In this book, you will be encouraged to drink from the river of His pleasure! (Ps. 36:8)

The Other People

A guide to ecstatic trance for spiritual and emotional development, spirit journeying, and connection to the collective unconscious • Describes more than 20 ecstatic trance postures for healing, divination, spirit journeys, shape-shifting, past-life recovery, and connecting to the Akashic field • Explores the physiology and psychology of ecstatic trance journeying • Provides guidance for those with little or no experience as well as methods to deepen practice Over the millennia shamanic

trance journeying has been used as a way of healing, of providing answers to questions, and of offering solutions to individual, family, and community problems. Though traditionally it was the shaman of the community who went on such journeys, the revolutionary work of the late anthropologist Felicitas Goodman shows that we all have these shamanic powers. Her research on the body postures found in ancient primitive art and in the practices of contemporary shamans offers each of us the ability to experience ecstatic trance journeys firsthand. A student of Felicitas Goodman and Belinda Gore, psychologist Nicholas Brink examines more than 20 traditional trance postures for divination, decision making, letting go of guilt and grief, healing of illness and emotional pain, spirit journeys, shape-shifting, interacting with animal spirits and the dead, and discovering past lives. Exploring the physiology and psychology of ecstatic journeying, he offers guidance for those with little or no experience as well as methods for longtime practitioners to deepen their practice and reclaim the extrasensory power of our ancient ancestors. Offering solid theories of how ecstatic trance triggers healing and spiritual development, Brink explains how trance journeying allows us to tap in to the collective unconscious, or Universal Mind, and access the information matrix of the Akashic field.

William Carlos Williams Award citation *Trances of the Blast* is a major new collection from recent National Book Critics Circle Award finalist Mary Ruefle.
