Entrepreneurship

In her latest novel, Indira Ganesan, a writer often likened to Arundhati Roy and Chitra Divakaruni (see back of jacket for reviews), gives us an enchanting story of family life that is a dance of love and grief and rebirth set on a gorgeous island in the Indian Ocean. The island is filled with exotic flora and fauna and perfumed air. A large family compound is presided over by a benign, stalwart grandmother. There is a very tall South Asian heroine with the astonishing un-Indian name of Meterling, who has found love at last in the shape of a short, round, elegant Englishman who wears white suits. There are also numerous aunts, uncles, and young cousins—among them, Mina, grown now, and telling this story of a marriage ceremony that ends with a widowed bride who, in the midst of her grief, discovers she is pregnant. While enjoying their own games and growing pains, Mina and her young cousins follow every nuance of gossip, trying to puzzle out what is going on with their favorite aunt, particularly when the groom's cousin arrives from England and begins to woo her. As Meterling—torn between Eastern and Western ideas of love and family, duty and loyalty—struggles to make a new life, we become as entranced with this family, its adventures and complications, as Mina is. And with her we celebrate a time and place where, although sometimes difficult, life was for the most part as sweet as honey. BONUS MATERIAL: This ebook edition includes an excerpt from Indira Ganesan's *Inheritance*.

The Future of Management in an AI World

The South Africa Act 1909 was an Act of the British Parliament which created the Union of South Africa from the British colonies of the Cape of Good Hope, Natal, Orange River Colony, and Transvaal.

Ruthenium Chemistry

The human imagination manifests in countless different forms. We imagine the possible and the impossible. How do we do this so effortlessly? Why did the capacity for imagination evolve and manifest with undeniably manifold complexity uniquely in human beings? This handbook reflects on such questions by collecting perspectives on imagination from leading experts. It showcases a rich and detailed analysis on how the imagination is understood across several disciplines of study, including anthropology, archaeology, medicine, neuroscience, psychology, philosophy, and the arts. An integrated theoretical-empirical-applied picture of the field is presented, which stands to inform researchers, students, and practitioners about the issues of relevance across the board when considering the imagination. With each chapter, the nature of human imagination is examined - what it entails, how it evolved, and why it singularly defines us as a species.

Personal Enmity in Roman Politics, 218-43 B.C.

George Morrison's goal in creating the Thirteenth Edition of *Early Childhood Education Today* was to collect the most current, researched-based information available on providing the high-quality early education all children need to be successful in school and in life. The new edition integrates thirteen critical themes that are foundational to the field today: the importance of children's literacy development, teaching in increasingly diverse classrooms, applying developmentally appropriate practice, closing the achievement gaps between children in poverty and those that are more economically advantaged, integrating special education and early childhood education, teaching in an inclusive classroom, closing school readiness gaps, meeting the challenges of teacher accountability, integrating STEM subjects into the curriculum, providing for children's mental health, using technology to support learners, developing as a professional, and guiding children's behavior to promote personal responsibility. The new edition retains the engaging style that has made the book so popular and provides practical examples of authentic teaching practices used by master teachers around the country. Its strong coverage of development in the age-specific chapters and its emphasis on diversity make it the leading book in the field.

Litteratura Coleopterologica (1758-1900)

Creativity can be viewed as the first stage of the overall innovation process, an important dimension of the entrepreneurship and new venture creation processes, and as such, it is considered to be a cornerstone of organizational competitiveness in this global, knowledge-based economy. Research on creativity has increasingly become multilevel, with most work conducted at the individual or team level of analysis. At the same time, there is a large body of research being conducted at the organizational level of analysis on innovation, and there has been a significant amount of entrepreneurship research at the individual level, with an increasing focus on organizational entrepreneurship. However, these three research streams have developed independently, and there has been very little knowledge transfer between the three areas. Because entrepreneurship is often said to be a process that is required to convert innovation into business ventures that will deliver benefits to stakeholders, it is typically driven by an individual or small group of individuals. Creativity research, innovation research, and entrepreneurship research have the potential to inform each other, enriching our knowledge of each area, particularly with regard to the cognitive processes and behaviors that are most effective. This Handbook includes contributions from the leading scholars in these three research areas, who integrate contemporary research findings on organizational creativity, innovation, and entrepreneurship and provide fruitful new research directions."

South Africa Act of 1909

Forget about building a business—businesses fail and fade into oblivion. Start a revolution instead. James Watt started a rebellion against tasteless mass market beers by founding BrewDog, now one of the world's best-known and fastest growing craft breweries, famous for beers, bars, and crowdfunding. In this smart, funny book, he shares his story and explains how you too can tear up the rule book and start a company on your own terms. It's an anarchic, DIY guide to entrepreneurship—and a new manifesto for business. After spending seven years on the high seas of the North Atlantic, James Watt started BrewDog craft brewery in Scotland with his best friend, Martin Dickie. They didn't have a business plan. All they had was a mission to revolutionize beer drinking and make other people as passionate about craft beer as they are. They've succeeded. Within a few years, BrewDog was huge—a world-famous craft brewery with beer bars around the globe and hundreds of thousands of fans. Those fans became literal backers of their business with the introduction of an unprecedented crowdfunding movement, Equity for Punks. And in rewriting the record books and kickstarting a revolution—James and BrewDog inadvertently forged a whole new approach to business. Business for Punks bottles the essence of James's methods in an accessible, honest manifesto. Among his mantras: · Cash is motherf*cking king. Cash is the lifeblood of your company. Monitor every penny as if your life depends on it—because it does. · Get people to hate you. You won't win by trying to make

everyone happy, so don't bother. Let haters fuel your fire while you focus on your hard-core fans. · Steal and bastardize from other fields. Take inspiration freely wherever you find it— except from people in your own industry. · Job interviews suck. They never reveal if someone will be a good employee, only how good that person is at interviews. Instead, take them for a test drive and see if they're passionate and a good culture fit. Business for Punks rethinks conventional business wisdom so you can go beyond the norm. It's an anarchic, indispensable guide to thriving on your own terms. From the Hardcover edition.

Big Bug, Little Bug

Public health ethics is a discipline concerned with the health of the public or a population as a whole, rather than focusing on the individual. This book introduces a number of this new field's central concepts and explores the key and controversial issues arising. Topics covered include the nature of public health ethics, the concepts of disease and prevention, risk and precaution, health inequalities and justice, screening, vaccination and disease control, smoking and issues relating to the environment and public health. With insightful contributions from leading experts, Public Health Ethics presents thought-provoking reviews of these topics, at the same time as encouraging and identifying areas for future discussion in this emerging discipline. This is a valuable addition to the library of anyone working in the fields of public health, health policy, ethics, philosophy and

social science.

Early Childhood Education Today

The second edition of this popular text has been thoroughly updated to reflect contemporary developments in small business and entrepreneurship and its applications to Australasian organisations. Entrepreneurship and small business management are two very close and often overlapping disciplines. If entrepreneurship specifically refers to the dynamic process of creating a new business venture, small business management generally addresses various issues in organising and operating a small business. In practice however, a large part of the textbooks contents from both disciplines tend to cover similar issues such as small business start-up (starting from scratch, buying an existing business or operating a franchise), developing a business plan, selecting a legal form of organisation, marketing research and organising and financing the new venture. Features New! Four end-of-book cases profiling Australasian entrepreneurs. Each case represents a different region covering Australia, New Zealand, Malaysia and Singapore. The companies profiled are within industries of interest to students including branded fitness programs, automatic video production and specialist healthcare. Each case is accompanied by comprehensive teaching notes. New! Accompanying local video cases and activities for instructors. The videos are closely tied to each end-of-book case, providing visual support to assist students'

understanding. Comprehensive text website including Instructor's Resource Guide and Power Point slides The geographic markets for the book are both Australasia (Australia and New Zealand) and South East Asia (Indonesia, Hong Kong, Malaysia and Singapore). As an increasing amount of goods, capital and people move between these two regions, this text will provide the reader with a better regional understanding of this environment. The 'What would you do?' feature presents a scenario in which an entrepreneur/small business manager needs to respond to a problem or situation. The 'Entrepreneur profile' in every chapter profiles Australian, New Zealand and Asia-Pacific entrepreneurs and small business leaders. The end-of-chapter case study profiles an entrepreneurial approach and/or small business management issue in the Pacific Rim.

Abbé Sicard's Deaf Education

Telling Stories Differently

Little bugs of all shapes and sizes show off their differences in rhyming text.

Cadence

A. S. Neill, founder of Summerhill, the most admired and most feared of all progressive schools, was famous as a schoolteacher, educational reformer, and author of illuminating and stylish books about education and the mind of the child. But few people know he was also a dedicated, prolific, uninhibited, witty and often mischievous letter writer. This selection of gems, first published in 1983, has been chosen from hundreds of his letters by his biographer. It includes letters about education, children, politics, writing, fatherhood, the Bomb, old age and death. 'All the best, Neill' was the familiar ending of his letters to the famous – H. G. Wells, Bertrand Russell, Henry Miller, Paul Goodman, Wilhelm Reich, Homer Lane; to important educators – W. B. Curry of Dartington, John Aitkenhead of Kilquhanity, Bob Mackenzie of Braehead, Dora Russell of Beacon Hill; to unknown friends, parents, and even casual correspondents. To read these letters is to share the company of a great and always delightful man, who wrote each one with the same commitment and gaiety.

Conference on the Exchange of Agricultural Films for Television

Modern cases highlight the legal principles involving parties and situations that are entrepreneurial in nature in this one-of-a-kind text. Students are presented with solid doctrine in the various disciplines covered in Entrepreneurship Law and come to understand their interrelatedness. A chronological approach, from the conception of the idea through all stages of the business, includes potential exit

strategies such as the sale of the venture or an initial public offering. Hypotheticals based on the authors' vast experience as practicing attorneys focus on the very real issues entrepreneurs face. The authors teach at Northwestern Law, well-known for its entrepreneurship course, which is one of the longest-running in the U.S. *Entrepreneurship Law: Cases and Materials* is the only law school casebook of its kind. Features: modern cases highlight legal principles solid doctrine in the various disciplines covered in *Entrepreneurship Law*, emphasizing their interrelatedness chronological approach from the conception of the idea through all stages of the business, includes potential exit strategies such as sale of venture or initial public offering hypotheticals highlight actual issues entrepreneurs face informed by authors' vast experience as practicing attorneys authors teach at Northwestern Law well-known entrepreneurship course one of the longest-running in the U.S. only law school casebook of its kind

The Goldwatcher

The American Spirit

This pioneering study offers a conceptual model and rich empirical evidence to help researchers and policy-makers understand informal innovation in developing

countries.

The telephone book

Presentations of war and violence in museums generally oscillate between the fascination of terror and its instruments and the didactic urge to explain violence and, by analysing it, make it easier to handle and prevent. The museums concerned also have to face up to these basic issues about the social and institutional handling of war and violence. Does war really belong in museums? And if it does, what objectives and means are involved? Can museums avoid trivializing and aestheticising war, transforming violence, injury, death and trauma into tourist sights? What images of shock or identification does one generate - and what images would be desirable?

Fundamentals of Water Treatment Unit Processes

"Bibliographic references to works pertaining to the taxonomy of Coleoptera published between 1758 and 1900 in the non-periodical literature are listed. Each reference includes the full name of the author, the year or range of years of the publication, the title in full, the publisher and place of publication, the pagination with the number of plates, and the size of the work. This information is followed by

the date of publication found in the work itself, the dates found from external sources, and the libraries consulted for the work. Overall, more than 990 works published by 622 primary authors are listed. For each of these authors, a biographic notice (if information was available) is given along with the references consulted"--[p. 1].

The Pioneers

The finance sector of Western economies is too large and attracts too many of the smartest college graduates. Financialization over the past three decades has created a structure that lacks resilience and supports absurd volumes of trading. The finance sector devotes too little attention to the search for new investment opportunities and the stewardship of existing ones, and far too much to secondary-market dealing in existing assets. Regulation has contributed more to the problems than the solutions. Why? What is finance for? John Kay, with wide practical and academic experience in the world of finance, understands the operation of the financial sector better than most. He believes in good banks and effective asset managers, but good banks and effective asset managers are not what he sees. In a dazzling and revelatory tour of the financial world as it has emerged from the wreckage of the 2008 crisis, Kay does not flinch in his criticism: we do need some of the things that Citigroup and Goldman Sachs do, but we do not need Citigroup and Goldman to do them. And many of the things done by Citigroup and Goldman

do not need to be done at all. The finance sector needs to be reminded of its primary purpose: to manage other people's money for the benefit of businesses and households. It is an aberration when the some of the finest mathematical and scientific minds are tasked with devising algorithms for the sole purpose of exploiting the weakness of other algorithms for computerized trading in securities. To travel further down that road leads to ruin. A Financial Times Book of the Year, 2015 An Economist Best Book of the Year, 2015 A Bloomberg Best Book of the Year, 2015

Shrinking the Malaria Map

It is 1898. India is ruled by the British, and India's women are ruled by British masters as well as Indian men. A desperate young widow sacrifices her firstborn child to save herself from ultimate dishonor. She marries a stranger, but her damaged second family pays dearly for this Faustian bargain. Then, an extraordinary atonement, strange liaisons in politics and love-spanning the two world wars and the Indian independence movement-help her descendants heal from this traumatic private history. Love's Garden demonstrates the strength, resilience, and unbreakable spirit of mothers and daughters navigating layers of oppression, all while the sun is not-so-peacefully setting on British India.

Essays in Honour of AJ Kerr

Why did the price of gold hit record highs in 2008? Take a look at the headlines - government bailouts of failed banks, mortgage and credit crises, rising inflation, slowing growth and global insecurity. In order to protect themselves from treacherous financial markets and depreciated paper currencies investors worldwide are turning to gold. Gold has long been used as money and as a store of wealth, but what's the source of its value? Why does that value sometimes rise so high and at other times fall so low? And what do we know about gold's complex and often tumultuous past that may yield clues about how it may behave in the future? Gold is a side show on a world financial stage dominated by the dollar. The tail can't wag the dog -gold prices are affected by changes in prospects for the dollar and not vice versa. With uncertain outcomes for the American and global economies, gold's stateless money franchise makes this book compelling reading. "John Katz is a clear eyed independent strategist and analyst with an extraordinary ability to get to grips with subjects ranging from biotechnology via alternative energy to commodities and gold. Uniquely for a commentator on gold he has no dogmas. To assess the risks and rewards that come with owning gold he introduces opinions from an impressive range of commentators, examines different scenarios that may play out on the world economic stage and highlights situations when owning gold makes sense and when it doesn't. To complete the picture Frank Holmes's contribution to *The Goldwatcher* explains the risks and rewards. The

Goldwatcher has been written for 21st century investors. It will be an indispensable resource for responsible people from institutional money managers to private savers - whether the gold price moves up, down, or sideways." —Patrick H. Spencer, Managing Director, Head of Institutional Sales, Robert W. Baird Limited, London "Frank Holmes's stellar track record as a resource portfolio manager is a clear reflection of his understanding of the business, the markets and the factors that affect them. His success is as much about unearthing value as it is about creating an investment process that is religiously followed. If you want to succeed in your resource investment, this book is a must. It's all the more enjoyable because the writing style is easy-going, clear and understandable." —Pierre Lassonde, Former chairman, World Gold Council, and past president, Newmont Mining Corp This book is also supported by The Goldwatcher blog - <http://www.thegoldwatcher.com>, which addresses news and developments affecting gold and the dollar, updates statistical information and links with sources for data and commentary.

Other People's Money

First published in 1998, this book formed part of an ongoing effort to restore politics and history to the centre of Blake studies. It adopts a three pronged approach when presenting its essays, seeking to promote a return to the political Blake; to deepen the understanding of some of the conversations articulated in

Blake's art by introducing new, historical material or new interpretations of texts; and to highlight differing perspectives on Blake's politics among historically focused critics. The collection contains essays with varying methodological assumptions and differing positions on questions central to historicist Blake scholarship.

Handbook of Research on Administration, Policy, and Leadership in Higher Education

Transforming Urban Transport brings into focus the origins and implementation pathways of significant urban transport innovations that have recently been adopted in major, democratically governed world cities that are seeking to advance sustainability aims. It documents how proponents of new transportation initiatives confronted a range of administrative, environmental, fiscal, and political obstacles by using a range of leadership skills, technical resources, and negotiation capacities to move a good idea from the drawing board to implementation. The book's eight case studies focus on cities of great interest across the globe--Los Angeles, Mexico City, New York, Paris, San Francisco, Seoul, Stockholm, and Vienna--many of which are known for significant mayor leadership and efforts to rescale power from the nation to the city. The cases highlight innovations likely to be of interest to transport policy makers from all corners, such as strengthening public transportation services, vehicle and traffic management measures, repurposing roads and other urban spaces away from their initial function as vehicle travel corridors, and turning sidewalks and city streets into more pedestrian-friendly places for walking, cycling, and leisure. Aside from their

transformative impacts in transportation terms, many of the policy innovations examined here have altered planning institutions, public-private sector relations, civil society commitments, and governance mandates in the course of implementation. In bringing these cases to the fore, Transforming Urban Transport advances understanding of the conditions under which policy interventions can expand institutional capacities and governance mandates, particularly linked to urban sustainability. As such, it is an essential contribution to larger debates about what it takes to make cities more environmentally sustainable and the types of strategies and tactics that best advance progress on these fronts in both the short- and the long-term.

Does War Belong in Museums?

Over the course of his career, David McCullough has spoken before Congress, colleges and universities, historical societies, and other esteemed institutions. Now, at a time of self-reflection in America following a bitter election campaign that has left the country divided, McCullough has collected some of his most pertinent speeches in a brief volume designed to identify important principles and characteristics that are particularly American.

Love's Garden

This book provides a coherent and conceptual portrayal of aspects of the theological research theme, entitled Ecodomy (literally meaning to 'build a house'). In its figurative meaning the term Ecodomy addresses the theme, 'life in its fullness'. This fullness of life entails a polarity which is inherently part of life, namely its brokenness and its wholeness. From various theological disciplines, namely Old Testament Studies, New Testament Studies, Systematic Theology, Church History and Practical Theology, both the brokenness and wholeness are addressed theologically. Every chapter focuses on a specific theological discipline, while the combination of theological disciplines, addresses the brokenness and wholeness of life as coherent concept. One pole does not exclude the other. Brokenness is visible in current or recent very relevant societal challenges, such as racism and xenophobia, apartheid, foreignness and exclusivism, leadership crises and violence. In contrast, wholeness is embedded in themes such as the African concept of ubuntu, a life of faith and wisdom, reconciling leadership, or transforming space and community. Ultimately, a Greek term ἀναΐδεια (persistence) is connected to the meaning of Ecodomy and 'life in its fullness'. Several methodologies have been used in the different contributions of the book. Every theological discipline applies a different methodology for the purpose of exposing a specific topic or research theme. In general, the contributions in this book follow a combination of a literature study with the further application of diachronic and synchronic exegetical methods. In addition, single contributions follow an own hermeneutical approach. Not one single contribution, but a

combination of different theological disciplines, which form the concepts of brokenness and wholeness (life in its fullness), which expose the polarity of life, are included in this book. In its exposed interdisciplinary interwovenness, the book provides a tapestry of how different theological disciplines are combined into a single theme and how they contribute together by means of theological analyses and attempted building blocks to build the broken 'houses' of societal structures or human life. The book contributes to selected aspects of broken life in society and the healing experiences of human life. Several themes touch on recent and relevant challenges which have contributed to the brokenness of life. Not only in South Africa, but globally these are currently relevant themes. They include realities of racism and xenophobia, apartheid, foreignness and exclusivism, leadership crises and violence. With the focus on wholeness, specific attention is given to the African concept of ubuntu, a life of faith and wisdom, reconciling leadership, and transforming space and society. A Greek term ἀναίδεια (insolence as 'in keeping on asking' - Lk 11:8) illuminates the theme of Ecodomy from the perspective of a parable. The target audience of the book is academic scholars and theologians, who specialise in the different fields of Theology, the Humanities and other Social Sciences. Furthermore, the book is also accessible to scholars of other academic disciplines outside these disciplines. The book contains original research and contributions have not been plagiarised from publications elsewhere.

Today's Children and Yesterday's Heritage

Packed with information that will entertain, inform, educate, and surprise you. This is an unmissable gallery of breathtaking photographs and is an essential reference for all lovers of photography. Is photography art, documentary, or both? Should images simply reveal the world we live in, or provoke us to think, act, and react? A visually arresting reference, *1001 Photographs You Must See Before You Die* is an invaluable guide to the history and practice of photography. Sweeping through the arts, fashion, society, war, peace, science, and nature, the images in this enticing book are as eye-catching as the commentary is engaging. Some you have seen, others will be unfamiliar, but what all the photographs have in common is their ability to move you, shock you, and open up the notion of what it is to be human. Organised chronologically by the date that each image was made, and featuring a reproduction of each photograph, the selection provides some fascinating and unexpected juxtapositions. Insightful text uncovers the creative process behind each image, revealing its visual, aesthetic, and historic significance. Why was the photograph taken? Was it set up? What was the intention? How did the world react? From Fox Talbot to Nick Knight, from Roger Fenton to William Eggleston, and from Cartier Bresson to Diane Arbus, all the photographers featured in this book transgressed the boundaries of the camera with a skill and spirit that helped to develop their field into a highly evocative art form. In a world where millions of snapshots are taken every day, these exquisite images stand out for their eye-catching content and technical prowess, provoking reactions that range from joy,

exasperation, and horror to fascination, repulsion and ecstasy. Uncovering the compelling tales behind the lens, this comprehensive global encyclopaedia reveals how this powerful art form has shaped the modern world.

Blake, Politics, and History

General Principles of the Law of Contract

Profiles the history, people, culture, artwork, beliefs, and daily life of Moctezuma's Mexico.

Public Health Ethics

The creation of a sustainable and accessible higher education systems is a pivotal goal in modern society. Adopting strategic frameworks and innovative techniques allows institutions to achieve this objective. The Handbook of Research on Administration, Policy, and Leadership in Higher Education is an authoritative reference source for the latest scholarly research on contemporary management issues in educational institutions and presents best practices to improve policies and retain effective governance. Addressing the current state of higher education

at an international level, this book is ideally designed for academicians, educational administrators, researchers, and professionals.

10 romans inédits Passions + 1 gratuit (n°565 à 569 - novembre 2015)

Argues that ordinary people exercise extraordinary political courage and power in American politics when, frustrated by politics as usual, they rise up in anger and hope, and defy the authorities and the status quo rules that ordinarily govern their daily lives. By doing so, they disrupt the workings of important institutions and become a force in American politics. Drawing on critical episodes in U.S. history, Piven shows that it is in fact precisely at those seismic moments when people act outside of political norms that they become empowered to their full democratic potential.

Business for Punks

Ecodomy - Life in its fullness

Carefully designed to balance coverage of theoretical and practical principles,

Fundamentals of Water Treatment Unit Processes delineates the principles that support practice, using the unit processes approach as the organizing concept. The author covers principles common to any kind of water treatment, for example, drinking water, municipal wastewater, industrial water treatment, industrial waste water treatment, and hazardous wastes. Since technologies change but principles remain constant, the book identifies strands of theory rather than discusses the latest technologies, giving students a clear understanding of basic principles they can take forward in their studies. Reviewing the historical development of the field and highlighting key concepts for each unit process, each chapter follows a general format that consists of process description, history, theory, practice, problems, references, and a glossary. This organizational style facilitates finding sections of immediate interest without having to page through an excessive amount of material. Pedagogical Features End-of-chapter glossaries provide a ready reference and add terms pertinent to topic but beyond the scope of the chapter Sidebars sprinkled throughout the chapters present the lore and history of a topic, enlarging students' perspective Example problems emphasize tradeoffs and scenarios rather than single answers and involve spreadsheets Reference material includes several appendices and a quick-reference spreadsheet Solutions manual includes spreadsheets for problems Supporting material is available for download Understanding how the field arrived at its present state of the art places the technology in a more logical context and gives students a strong foundation in basic principles. This book does more than build technical proficiency, it adds

insight and understanding to the broader aspects of water treatment unit processes.

Transforming Urban Transport

Abbé Sicard was a French revolutionary priest and an innovator of French and American sign language. He enjoyed a meteoric rise from Toulouse and Bordeaux to Paris and, despite his non-conformist tendencies, he escaped the guillotine. In fact, the revolutionaries acknowledged his position and during the Terror of 1794, they made him the director of the first school for the deaf. Later, he became a member of the first Ecole Normale, the National Institute, and the Académie Française. He is recognized today as having developed Enlightenment theories of pantomime, "signing," and a form of "universal language" that later spread to Russia, Spain, and America. This is the first book-length biography of Sicard published in any language since 1873, despite Sicard's international renown. This thoughtful, engaging work explores French and American sign language and deaf studies set against the backdrop of the French Revolution and Napoleon.

As Sweet as Honey

This book will describe Ruthenium complexes as chemotherapeutic agent

specifically at tumor site. It has been the most challenging task in the area of cancer therapy. Nanoparticles are now emerging as the most effective alternative to traditional chemotherapeutic approach. Nanoparticles have been shown to be useful in this respect. However, in view of organ system complicacies, instead of using nanoparticles as a delivery tool, it will be more appropriate to synthesize a drug of nanoparticle size that can use blood transport mechanism to reach the tumor site and regress cancer. Due to less toxicity and effective bio-distribution, ruthenium (Ru) complexes are of much current interest. Additionally, lumiscent Ru-complexes can be synthesized in nanoparticle size and can be directly traced at tissue level. The book will contain the synthesis, characterization, and applications of various Ruthenium complexes as chemotherapeutic agents. The book will also cover the introduction to chemotherapy, classification of Ru- complexes with respect to their oxidation states and geometry, Ruthenium complexes of nano size: shape and binding- selectivity, binding of ruthenium complexes with DNA, DNA cleavage studies and cytotoxicity. The present book will be more beneficial to researchers, scientists and biomedical. Current book will empower specially to younger generation to create a new world of ruthenium chemistry in material science as well as in medicines. This book will be also beneficial to national/international research laboratories, and academia with interest in the area of coordination chemistry more especially to the Ruthenium compounds and its applications.

Entrepreneurship Law

1001 Photographs You Must See Before You Die

The #1 New York Times bestseller by Pulitzer Prize-winning historian David McCullough rediscovers an important chapter in the American story that's "as resonant today as ever" (The Wall Street Journal)—the settling of the Northwest Territory by courageous pioneers who overcame incredible hardships to build a community based on ideals that would define our country. As part of the Treaty of Paris, in which Great Britain recognized the new United States of America, Britain ceded the land that comprised the immense Northwest Territory, a wilderness empire northwest of the Ohio River containing the future states of Ohio, Indiana, Illinois, Michigan, and Wisconsin. A Massachusetts minister named Manasseh Cutler was instrumental in opening this vast territory to veterans of the Revolutionary War and their families for settlement. Included in the Northwest Ordinance were three remarkable conditions: freedom of religion, free universal education, and most importantly, the prohibition of slavery. In 1788 the first band of pioneers set out from New England for the Northwest Territory under the leadership of Revolutionary War veteran General Rufus Putnam. They settled in what is now Marietta on the banks of the Ohio River. McCullough tells the story

through five major characters: Cutler and Putnam; Cutler's son Ephraim; and two other men, one a carpenter turned architect, and the other a physician who became a prominent pioneer in American science. "With clarity and incisiveness, [McCullough] details the experience of a brave and broad-minded band of people who crossed raging rivers, chopped down forests, plowed miles of land, suffered incalculable hardships, and braved a lonely frontier to forge a new American ideal" (The Providence Journal). Drawn in great part from a rare and all-but-unknown collection of diaries and letters by the key figures, *The Pioneers* is a uniquely American story of people whose ambition and courage led them to remarkable accomplishments. "A tale of uplift" (The New York Times Book Review), this is a quintessentially American story, written with David McCullough's signature narrative energy.

The Informal Economy in Developing Nations

Artificial Intelligence (AI) is redefining the nature and principles of general management. The technological revolution is reshaping industries, disrupting existing business models, making traditional companies obsolete and creating social change. In response, the role of the manager needs to urgently evolve and adjust. Companies need to rethink their purpose, strategy, organisational design and decision-making rules. Crucially they will also need to consider how to nurture and develop the business leaders of the future and develop new ways to interact

with society on issues such as privacy and trust. Containing international insights from leading figures from the world of management and technology, this book addresses the big challenges facing organisations, including:

- Decision-making
- Corporate strategy
- People management and leadership
- Organisational design

Taking a holistic approach, this collection of expert voices provides valuable insight into how firms will discover and commit to what makes them unique in this new big data world, empowering them to create and sustain competitive advantage.

All the Best, Neill (Routledge Revivals)

The Cambridge Handbook of the Imagination

• The aim of this book is to share a relatively loose collection of studies using digital storytelling as a pedagogical tool in Cape Peninsula University of Technology (CPUT). The book takes an informed social justice approach to teaching and learning, at the heart of which is the exploration of DST as a practice of voice and agency. Voice and agency are important in excavating and recovering subjugated identities, and moving the concerns of those occupying subaltern spaces to the mainstream of teaching and learning. Yet this discursive shift is not without inherent challenges. Multi-modal technologies are reflective of wider inequities in

the so-called technological divide. Whilst this is a book about higher education, there are important lessons for schooling. On the one hand, the book is a powerful demonstration of the potential of DST for enhancing learning in schools, particularly in schools serving the poor and marginalised. On the other hand, improving teaching and learning in higher education, through the creative use of technology, is essential to overcome the learning challenges of those entering tertiary level institutions.

Moctezuma's Mexico

"Provides informed practical means of achieving and sustaining zero transmission. It is designed as a road map, providing direction and options from which to choose an appropriate path. The Prospectus reviews the operational, technical, and financial feasibility for those working on the front lines and outlines the tools that can be considered for an elimination program."
