The Power of Logic

Marshall Seaver is being haunted. It begins with mysterious sounds, a fleeting face outside a window, a rogue breeze—all things that can be explained away. That is, until he comes face-to-face with a character who only exists on the pages of a sketchbook—a character Marshall himself created. Marshall has no idea why he is being tormented by this forbidding creature, but he is quickly convinced it has something to do with his best friend, Cooper, who has gone missing. Together with Cooper's beautiful but aloof sister, Sydney, Marshall searches for the truth about his friend while ultimately uncovering a nightmare that is bigger and more frightening than he could ever have imagined. Number one New York Times bestselling author D. J. MacHale launches his eerie new trilogy with a story so packed with chilling suspense, readers will want to sleep with the light on. * * * The voices grew louder, more urgent, as if they were running out of time. It sounded like gibberish. It was gibberish. I knew that. It was a dream, right? That's what I told myself and it calmed me down. That is, until I heard a single word break through the haze as plain and clear as if someone had leaned over and spoke directly into my ear. --"Morpheus."

Daniel's New Friend

This book introduces the basic concepts of particle cosmology and covers all the

main aspects of the Big Bang Model (expansion of the Universe, Big Bang Nucleosynthesis, Cosmic Microwave Background, large scale structures) and the search for new physics (inflation, baryogenesis, dark matter, dark energy). It also includes the majority of recent discoveries, such as the precise determination of cosmological parameters using experiments like WMAP and Planck, the discovery of the Higgs boson at LHC, the non-discovery to date of supersymmetric particles, and the search for the imprint of gravitational waves on the CMB polarization by Planck and BICEP. This textbook is based on the authors' courses on Cosmology, and aims at introducing Particle Cosmology to senior undergraduate and graduate students. It has been especially written to be accessible even for those students who do not have a strong background in General Relativity and quantum field theory. The content of this book is organized in an easy-to-use style and students will find it a helpful research guide.

In Pura vida (Life is good) Spanish is more than vocabulary and grammar, just as Spanish-speaking cultures are more than products and practices. In this learner-centered introductory program, the authors' commitment to a methodology based on true-to-life experiences brings Spanish to life. Pura vida is the discovery of a Spanish-speaking world through the experiences of real people who share anecdotes and reflections on those experiences. Students relate to these people and make deeper, more meaningful connections between language and culture, and acquire Spanish with an unparalleled sense of personal engagement. In this 12-chapter introductory program, students don't only learn Spanish for real life, but also from real life. They discover that there is not just one homogeneous Hispanic culture, but rather that each Spanish-speaking country has its own rich, unique culture and that the people who live in these countries speak one common language with different accents, characteristics, and idiosyncrasies. The program offers truly seamless integration of cultural notions and language instruction and features 100% contextualized and personalized activities.

The Blood

South Asia is famous for its monuments, past and present. Monuments have been created, destroyed and rescued by competing communities and incoming empires in the making and re-making of history, identity and memory. This collection brings together an international cohort of senior scholars and younger researchers to examine the vast diversity of monuments (and conceptions of monuments) in South Asia from the 1850s to the present. The chapters investigate what constitutes a monument, and interrogate the conditions for its survival, demise or recycling. To explore the afterlives of monuments is to investigate how, where, when, and why monuments have been remodelled, re-sited, destroyed, defaced, or abandoned. It is to investigate the theories of memory, history and community, as well as new forms of artistic practice and global media. As different South-Asian communities claim a stake in the making of national, religious, cultural and local identities and histories, the status of monuments and debates about cultural memory have become increasingly urgent. This book was published as a special issue of South Asian Studies.

Corporate Information Strategy and Management

“I’m afraid there’s been a car accident” As Hannah Ryan waits for her family to return home from a camping trip, she realizes she has everything going for her—a husband other women admire, two charming teenage daughters, and a loving Christian home. As the sunny afternoon turns into twilight, her uneasiness grows along with the shadows. Then a car pulls into Hannah’s driveway, bringing two police officers and devastating news that shatters her life forever. In the days that

follow, Hannah struggles with unspeakable feelings of sorrow and rage—feelings that fuse into one chilling purpose for living: revenge against Brian Wesley, the drunk driver who has caused all her pain. In her fury, Hannah shuts the Lord out of her life. She's determined not to forgive Wesley or the God who allowed this tragedy to happen. Can two caring people help Hannah rediscover her faith before bitterness destroys her?

FE Mechanical Review Manual

The powerfully moving new novel from Sunday Times bestselling author, Maggie Hartley. Fourteen-year-old Shazia has been taken into care after a conversation at school leads her teacher to suspect that the teenager's family are planning to send her to Pakistan for an arranged marriage. To her family's fury, Shazia is sent to live with foster carer Maggie Hartley whilst social services investigate. But with Shazia denying everything and social services unable to find any evidence to support the teacher's fears, Shazia is allowed to return home. But a few weeks later, Maggie is woken up in the middle of the night by a phone call from a terrified Shazia, who has managed to escape the family home through a window. Sobbing, she confesses to Maggie that her parents are planning to send her to Pakistan to be married in a few days, and have threatened to kill her if she speaks out again. Returned to Maggie's care, Shazia is petrified that her parents will track her down and kill her, and Maggie must be on constant alert. But the worst is yet to come when it emerges that Shazia is the victim of FGM. Can Maggie help this damaged and traumatised young girl understand what has happened to her and to find a way to heal? In this new book, Maggie Hartley taps into the highly topical issues of FGM and arranged marriage, and presents a sensitive and unique insight into the effect these practices have on their young victims.

Solution Manual

This book is an idea of architects and friends Carles Llop, and Vicente Guallart, who were seduced by the way Barcelona is read by Jon Tugores' eyes. For the first time, the city is shown from the sea side, acknowledging the close relation of the city and the topography that encloses it. It somehow actualizes the drawings that imagined Barcelona done by the ancient navigators. The main reason for this book is to offer another point of view the way Barcelona is read. A tribute to scale, territory, nature and architecture. A complete vision of the evolution of a city that knows how dialogue with mountains and the Mediterranean constraints. A magnificent example of well-understood urbanism that dealt with the Roman Empire all the way to the re-shaping of a car infested city during the post-Olympic era. Without falling into imported cliches from other continents. A city always under a constant re-thinking attitude.

Images, Volume I

The West has always been a symbol of the wild frontier, rugged adventure, and dangerous exploration. However, if it wasn't for fear of the unknown, the West would just be another cardinal direction. Old Scratch and Owl Hoots delves into that fear and captures it in fourteen tales of terror set in the West ranging from the 1800s to the present day. Take a gander inside and you'll find stories dealing with a strange creature on Antelope Island that can never satisfy its hunger a young girl kidnapped by highwaymen; but she carries a dangerous secret a woman's vacation to Zion National Park that takes a dark turn when she can't stop hearing the cries of a newborn baby an outlaw on the run from Porter Rockwell who finds more than he bargains for in the Utah wilderness a war veteran who carries a darkness inside him that threatens his very own family. Experience these stories and more in Old Scratch and Owl Hoots. All the stories in the anthology are written by authors with Utah connections. Some are veterans at the craft, while others are making their debut. Cozy up next to a campfire and delve into these fourteen stories and find out why it's dangerous to be out and about in the West when the sun goes down.

Puppy Love

This is a concise presentation of the concepts underlying the design of digital communication systems, without the detail that can overwhelm students. Many examples, from the basic to the cutting-edge, show how the theory is used in the design of modern systems and the relevance of this theory will motivate students. The theory is supported by practical algorithms so that the student can perform computations and simulations. Leading edge topics in coding and wireless communication make this an ideal text for students taking just one course on the subject. Fundamentals of Digital Communications has coverage of turbo and LDPC codes in sufficient detail and clarity to enable hands-on implementation and performance evaluation, as well as 'just enough' information theory to enable computation of performance benchmarks to compare them against. Other unique features include space-time communication and geometric insights into noncoherent communication and equalization.

Fundamentals of Engineering Electromagnetics

This is the screenplay for the acclaimed film, directed by Wes Anderson. There were three extraordinary children in the Tenenbaum family; Chas Tenenbaum (Ben Stiller) was a financial expert and started buying real estate in his early teens; Margot Tenenbaum (Gwyneth Paltrow) was an acclaimed playwright and won a Pulitzer Prize in the 9th grade; Richie Tenenbaum (Luke Wilson) was a champion tennis player ranked 2nd in the world by the age 17. They were brilliant. They were famous. They were unlucky enough to be the children of a man named Royal Tenenbaum (Gene Hackman). Now for the first time in 25 years, they're all living together under the same roof. After having largely gone their separate ways they're looking to mend fences—and themselves in the process.
