### **Micro and macro level intervention in promotion of mental**

Neurolaw is a field of interdisciplinary study that explores the effects of discoveries in neuroscience on legal rules and standards. Drawing from neuroscience, philosophy, social psychology, cognitive neuroscience, and criminology, neurolaw practitioners seek to address not only the descriptive and predictive issues of how neuroscience is and will be used in the legal system, but also the

Distinction from ICD. An alternate, widely-used classification publication is the International Classification of Diseases (ICD) is produced by the World Health Organization (WHO). The ICD has a broader scope than the DSM, covering overall health as well as mental health; chapter 5 of the ICD specifically covers mental and behavioural disorders. Moreover, while the DSM is the most popular

## **WHO | Proposed declassification of disease categories**

In this article Rational Emotive Behavior Therapy (REBT) is proposed as a potentially important framework for the understanding and promotion of mental health in athletes. Cognitive-behavioral approaches predominate in the provision of sport psychology, and often form the backbone of psychological skills training for performance enhancement and maintenance.

## **Best Social Work Case Management Software 2021 | Reviews**

Getting research into policy and practice in healthcare is a recognised, world-wide concern. As an attempt to bridge the gap between research and practice, research funders are requesting more interdisciplinary and collaborative research, while actual experiences of such processes have been less studied. Accordingly, the purpose of this study was to gain more knowledge on the interdisciplinary
