Created around the world and available only on the Web, internet "television" series are independently produced, mostly low budget shows that often feature talented but unknown performers. Typically financed through online crowd-funding, they are produced with borrowed equipment and volunteer casts and crews, and viewers find them through word of mouth or by chance. The second in a first-ever set of books cataloging Internet television series, this volume covers in depth the drama and mystery genres, with detailed entries on 405 shows from 1996 through July 2014. In addition to casts, credits and story lines, each entry provides a website, commentary and episode descriptions. Index of performers and personnel are included.
