Small Lives (Vies minuscules), Pierre Michon's first novel, won the Prix France Culture. Michon explains that he wrote it "to save my own skin. I felt in my body that my life was turning around. This book born in an aura of inexpressible joy and catharsis rescued me more effectively than my aborted analysis." Le Monde calls it "his chef d'oeuvre. A bolt of lightning." In Small Lives, Michon paints portraits of eight individuals, whose stories span two centuries in his native region of La Creuse. In the process of exploring their lives, he explores the act of writing and his emotional connection to both. The quest to trace and recall these interconnected lives seared into his memory ultimately becomes a quest to grasp his own humanity and discover his own voice.

When a half sister whom he never knew joins the household, Finn takes her under his wing over an everlasting summer on Håøya Island. But he can't understand why everyone thinks his new sister is so different from every other child. Nor can he fathom his mother's painful secret, one that pushes them ever farther apart. Ethnic minority children now comprise over 75 percent of students in 100 of the largest cities in the United States. However, these students have not been given equal access to, nor benefited from, the contemporary mental health system as have their non-minority peers. TEMAS (Tell-Me-A-Story) Assessment in Multicultural Societies examines the health/mental care system in which professional service providers, including psychologists, labor to offer quality care for youth in the United States. The authors ardently support the use of the TEMAS assessment instrument as a useful tool for diagnosis of all youngsters, particularly its use on the growing population of minority children and adolescents. Part I presents a rationale and context for employing TEMAS. Introductory chapters describe the mental health

status of the population at-risk, as well as systems of care for youth where assessment and intervention are components. Topics to follow highlight a history of positive TEMAS test reviews with the detail required by instructors for preparing dedicated TEMAS courses. The volume thoroughly outlines cross-cultural studies and illustrates case examples of European-American, Hispanic/Latino, Asian-American, and forensic studies. TEMAS (Tell-Me-A-Story) Assessment in Multicultural Societies brings practical insight to instructors who teach standard assessment courses; clinicians, counselors, and school psychologists; assessment specialists; and administrators concerned with mental health services designed for children and adolescents.

What could this team of paranormal investigators expect to find when their travels lead them to an abandoned house deep in the wilds of the Appalachian Mountains? A mere ghost or haunting would have been a pleasant experience compared to the horrors that awaited them, and the truth they would uncover. Possibly the most puzzling and horrifying aspect of this investigation was the incredible power and hatred that this entity possessed, and where this energy came from. The fact that this menacing fiend had found it's way into their lives, and how it had done so, left these friends and team mates amazed, astounded and terrified. Based on true events.

Kentucky. For generations, the only practical means of transportation and contact with the outside world was the river, and, as The Big Sandy demonstrates, steamboats did much to shape the culture of the region. Carol Crowe-Carraco offers an intriguing and readable account of this region's history from the days of the venturesome Long Hunters of the eighteenth century, through the bitter struggles of the Civil War and its aftermath, up to the 1970s, with their uncertain promise of a new prosperity. The Big Sandy pictures these changes vividly while showing how the turbulent past of the valley lives on in the region's present.
